YOUR EYES and Your Glasses

Weekly Questions and Answers of Interest to Everyone
By Dr. C. L. Ingold, Local Optometrist

Question—Is it true that some folks start wearing glasses too soon?
Answer—Not if the Optometrist who first examined their eyes was up to standard in his work. With the modern equipment and methods of practice the skillful Optometrist will know when to put on glasses and when glasses are needed there is no substitute. Many who could at one time have had their eye troubles corrected very easily and quickly, wait until their eyes are in such a condition that the correction of their defect is most difficult.

Having your eyes examined does not necessarily mean you must start wearing glasses or have new lenses made. Knowing your true eye condition is most important at every age.
